

EduMind AI Project Documentation

Date September 2026
Team ID xxxxxx
Project Name EduMind AI - Smart AI-Powered Learning Assistant
Maximum Marks 3 Marks

Step 1: Project Overview

EduMind AI is a Smart AI-Powered Learning Assistant designed to provide students with an integrated learning experience through AI-powered question answering, concept explanation, quiz generation, study notes, summarization and learning-path recommendations.

Step 2: Project Objectives

S.No	Objective
1	Provide quick answers to student learning questions.
2	Explain difficult concepts in simple, beginner-friendly language.
3	Support practice and revision through AI-generated quizzes and notes.
4	Reduce long learning content into concise summaries.
5	Provide structured learning recommendations based on topic and level.

Step 3: Major Features

Feature	Description
Question Answering	Responds to general learning and programming questions.
Concept Explanation	Explains topics with simple language and examples.
Quiz Generation	Creates topic-based questions for practice.
Study Notes	Creates structured revision notes.
Summarization	Produces concise versions of longer content.
Learning Path	Suggests a sequence of topics based on subject and learner level.

Step 4: Technology Used

Category	Technology
Programming	Python
Backend	FastAPI + Uvicorn
Frontend	HTML, CSS, JavaScript
AI Integration	Google Gemini API / Google Gen AI SDK
Development	Visual Studio Code
Configuration	.env environment variables

Step 5: Team Members

K. ANNAMALAI R. YASWANTH A. ELANCHEZHIAN S. LOKESH V. SANJAI

Step 6: Conclusion

EduMind AI demonstrates how Generative AI can be integrated into an educational application to support answering, understanding, practicing, revising and planning learning activities through a single interface.
