

Problem-Solution Fit

Date September 2026
Team ID xxxxxx
Project Name EduMind AI - Smart AI-Powered Learning Assistant
Maximum Marks 3 Marks

Step 1: Problem Summary

Students often depend on multiple resources for answering questions, understanding difficult concepts, practicing with quizzes, preparing notes, summarizing content and deciding what to learn next.

Step 2: Solution Fit

User Problem	EduMind AI Solution	Fit
Multiple study tools are needed for different tasks.	A single web application combines Q&A;, explanations, quizzes, notes, summaries and learning-path guidance.	High
Difficult topics may need simpler explanations.	The AI generates beginner-friendly explanations with examples and structured steps.	High
Revision and practice can be time-consuming.	The system can generate quizzes, study notes and summaries from a topic or supplied content.	High
Students may lack a clear learning sequence.	The learning-path feature recommends structured next topics based on topic and level.	Medium

Step 3: Selected Solution

EduMind AI - Smart AI-Powered Learning Assistant is selected as the solution because it directly combines the most common student learning needs into one AI-powered interface.
