

Student Journey Map

Date September 2026
Team ID xxxxxx
Project Name EduMind AI - Smart AI-Powered Learning Assistant
Maximum Marks 3 Marks

Step 1: Student Learning Journey

The journey below shows how a learner moves from identifying a study need to receiving AI support and continuing with revision.

Stage	Student Need / Action	EduMind AI Touchpoint	Expected Outcome
1. Discover	Learner faces a question or difficult topic.	Open EduMind AI and choose the learning interaction.	Learning need is clearly identified.
2. Ask	Learner types a question or topic.	Question Answer / Explain feature.	Immediate AI-generated response.
3. Understand	Learner needs examples or simpler explanation.	Explain feature with beginner-friendly guidance.	Better conceptual understanding.
4. Practice	Learner wants to test understanding.	Quiz generation feature.	Practice questions for self-assessment.
5. Revise	Learner needs concise material.	Study Notes / Summarize feature.	Short revision-ready content.
6. Continue	Learner wants to know what to learn next.	Learning Path recommendation.	Structured next learning steps.

Step 2: Key User Experience Goal

Goal: Reduce the number of separate study tools a learner needs by bringing common AI-powered learning activities into one simple interface.
