

Functional & Non-Functional Requirements

Date September 2026
Team ID xxxxxx
Project Name EduMind AI - Smart AI-Powered Learning Assistant
Maximum Marks 3 Marks

Step 1: Functional Requirements

ID	Requirement	Priority
FR-01	The system shall accept user questions through the web interface.	High
FR-02	The system shall generate AI answers for general learning and programming questions.	High
FR-03	The system shall explain a topic in beginner-friendly language.	High
FR-04	The system shall generate topic-based quizzes.	High
FR-05	The system shall create structured study notes.	Medium
FR-06	The system shall summarize provided learning content.	Medium
FR-07	The system shall recommend a learning path based on topic and level.	Medium

Step 2: Non-Functional Requirements

ID	Requirement	Target
NFR-01	Usability	Simple, beginner-friendly interface and clear responses.
NFR-02	Performance	Normal requests should return within a practical response time subject to API availability.
NFR-03	Reliability	Application should handle invalid/empty requests with clear errors.
NFR-04	Security	API credentials must be stored outside source code using environment variables.
NFR-05	Maintainability	Feature logic should remain modular and easy to update.
