

# Project Communication

**Date** September 2026  
**Team ID** xxxxxx  
**Project Name** EduMind AI - Smart AI-Powered Learning Assistant  
**Maximum Marks** 3 Marks

## Step 1: Communication Objective

The team communicates the project idea, workflow, features and outcomes in a clear, structured and student-friendly manner.

## Step 2: Communication Points

| S.No | Communication Point  | What to Explain                                                                            |
|------|----------------------|--------------------------------------------------------------------------------------------|
| 1    | Project Introduction | Introduce EduMind AI and the purpose of the learning assistant.                            |
| 2    | Problem              | Explain the need for a single platform for common learning activities.                     |
| 3    | Solution             | Describe how EduMind AI uses Generative AI to support learners.                            |
| 4    | Features             | Briefly explain Q&A;, Explain, Quiz, Notes, Summary and Learning Path.                     |
| 5    | Technology           | Mention Python, FastAPI, frontend technologies and Gemini API integration.                 |
| 6    | Outcome              | Explain how the system supports understanding, practice, revision and structured learning. |

## Step 3: Presentation Style

Use simple language, show the working interface during the explanation, demonstrate one or two representative user requests, and conclude with the project's educational value.
