

Demonstration of EduMind AI Features

Date September 2026
Team ID xxxxxx
Project Name EduMind AI - Smart AI-Powered Learning Assistant
Maximum Marks 3 Marks

Step 1: Demonstration Sequence

Order	Feature	Demo Action	Expected Demonstration
1	Homepage	Open the EduMind AI web application.	Main interface loads successfully.
2	Question Answering	Enter: What is Python?	AI returns a clear educational answer.
3	Concept Explanation	Enter a topic such as Object-Oriented Programming.	AI provides a simplified explanation with examples.
4	Quiz	Enter a topic such as Python.	AI generates practice questions.
5	Study Notes	Enter a topic for notes.	Structured study notes are generated.
6	Summary	Provide learning content for summarization.	Concise study material is returned.
7	Learning Path	Enter a topic and learner level.	A structured learning sequence is generated.

Step 2: Demo Goal

Show that one application can support multiple parts of the learning workflow without requiring the student to switch between separate tools.
