

No. of Functional Features Implemented

Date September 2026
Team ID xxxxxx
Project Name EduMind AI - Smart AI-Powered Learning Assistant
Maximum Marks 3 Marks

Step 1: Functional Feature List

The following functional areas are included in the EduMind AI project to support common student learning tasks.

S.No	Functional Feature	Purpose	Priority
1	Question Answering	Answer questions across programming, mathematics, science, technology and general learning.	High
2	Concept Explanation	Explain difficult topics in simple language with useful examples.	High
3	Quiz Generation	Create topic-based questions for practice and self-assessment.	High
4	Study Notes	Generate structured notes containing key points, terms and examples.	High
5	Content Summarization	Convert longer learning content into concise revision material.	Medium
6	Learning Path Recommendation	Suggest a learning sequence based on topic and learner level.	Medium

Step 2: Feature Summary

Total functional feature areas documented: 6. These features cover the main learning workflow from asking questions and understanding concepts to practice, revision and structured next-step learning.
